program written in the C++ programming language is disclosed.
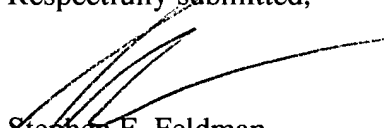

The first prior are is the old Don Best Sports programs, DBS. This program is written in Java and accessed via the Don Best website on the World Wide Web. The DBS Java program displays odds and lines from major Las Vegas and International sports books in real time, along with other sports gaming information.

Fig. 1 shows a screen shot of the DBS Java based prior art program. This represents the most relevant prior art. This program is accessed via the Don Best website, and is navigated through your web browser. The program is brought up through a series of web browser windows, which requires that multiple windows, of the web browser, be open at one time. The program can only be accessed after a valid username and password are entered on the initial login page.

CONCLUSION

ABSTRACT OF THE DISCLOSURE

The present invention [is directed toward] <u>involves</u> a method and system for providing sports betting information, in real time, utilizing a standard Internet connection on a computer to display the odds from a plurality of sports books. The system provides its users with a line seeker alert, a major line move alert, a bet tracker, and a fully customizable display. A method of gaining real time sports betting information without the use of a web browser, through the use of a separate program written in the C++ programming language is disclosed.

The first prior are is the old Don Best Sports programs, DBS. This program is written in Java and accessed via the Don Best website on the World Wide Web, [at www..donbest.com.] The DBS Java program displays odds and lines from major Las Vegas and International sports books in real time, along with other sports gaming information.

Fig. 1 shows a screen shot of the DBS Java based prior art program. This represents the most relevant prior art. This program is accessed via the Don Best website, [at <u>www.donbest.com</u>] and is navigated through your web browser. The program is brought up through a series of web browser windows, which requires that multiple windows, of the web browser, be open at one time. The program can only be accessed after a valid username and password are entered on the initial login page.
